PREFABRICATED BUILDINGS

Design, management and commissioning of mechanical, electrical and civil projects
Export of engineering related products and services throughout Africa

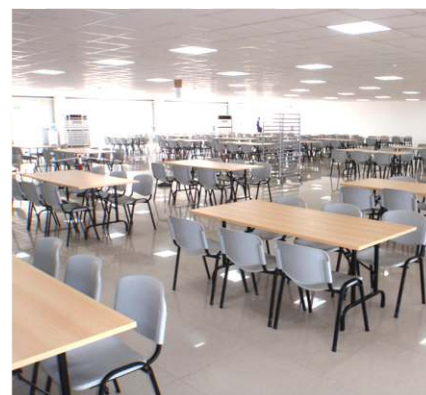

Development

With a team of engineers, draftsmen and experienced technical buyers, TGN is an extremely capable company that can adhere to the needs of the customers time and time again. TGN has received the Best Response Partner Award from Huawei.

TGN is highly flexible when it comes to prefabricated buildings. We can engineer, procure, design, supply and commission entire projects suited to the customers every need, from the smallest to the largest structures required.

TGN prides itself in having open and honest relationships with clients. We believe that a trusting relationship within the business environment is essential to fostering long term business relationships.

TGN has been in operation for 8 years and has accumulated an enormous amount of experience in that short period of time. We now price ourself in being specialist operators in Angola, DRC and Zambia.

Completed Projects

FCKS HOUSING PROJECT - ANGOLA

The engineering, design, procurement, supply and commissioning of a turnkey project for approximately 200 fully furnished house with appropriate facilities i.e. kitchens, bathrooms and bedrooms. There are several communal structures, a swimming pool, tennis courts, netball courts, a gym, a clubhouse, generators, septic tanks and water supply.

PAENAL CANTEEN - ANGOLA

The design, supply and construction of a 2500m² canteen that can seat 600 complete with a fully operational kitchen.

BOA FRUITA - ANGOLA

The design and supply of housing units for agricultural development.

OFFICE BLOCKS - ANGOLA

The construction of three prefabricated office blocks, fully furnished with air conditioning, approximately 1000m² per unit.
